

HELLO !

I am Arivah,
an
Petroleum
Engineering Student

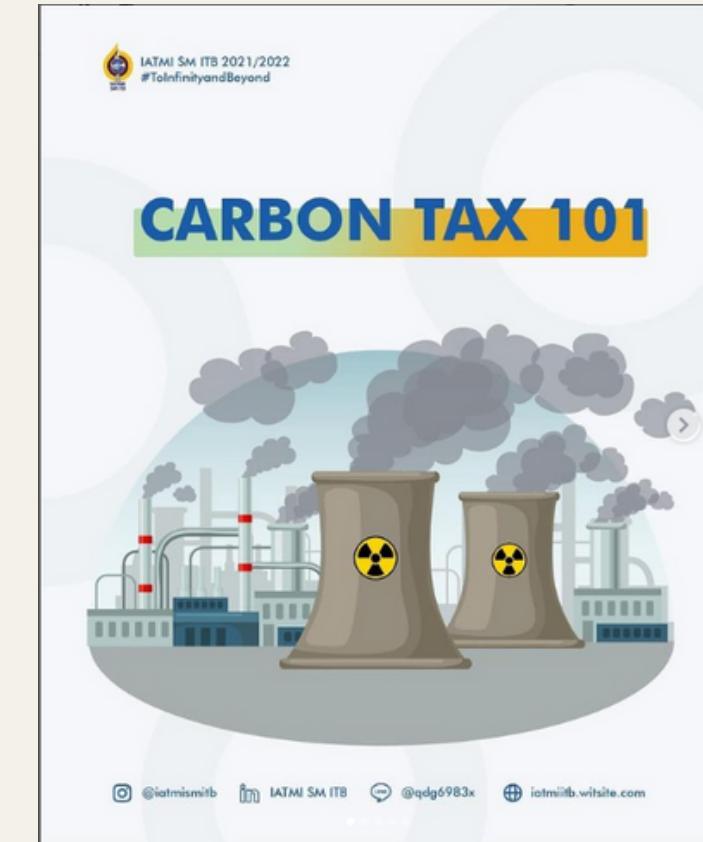

I have more interest in graphic design.
I Have been a graphic designer for almost
1 years in several organization and event.

THIS IS MY JOURNEY
WITH DESIGN !

DESIGN WITH IATMI

One of my first assignment in graphic design, create customized content in the form of feeds and captions which became a springboard and also a new challenge for me.

Making designs with iatmi is a cool job because we work in teams and also have a division head who is an expert in design.

DESIGN WITH PPKM ITB

Making designs with PPKM ITB is not less interesting, here I learned how to make vistock and also make designs that are much different from the grand designs I've worked on.

DESIGN WITH PARTA

Together with PATRA I learned not only to make graphic designs in the form of feeds but also in the form of videos, not only that with PATRA I also learned communication and professionalism because I worked with my seniors.

THANK YOU !
